AI and Analytics using Zia

Aim:

To explore and utilize Zia (Zoho's Artificial Intelligence assistant) and Zoho Analytics for performing intelligent data analysis, generating automated insights, predictions, and visualizations from application data.

Procedure:

1. Sign in to Zoho Account
 - Open a browser and go to the respective Zoho application (Zoho Creator / Zoho Analytics).
 - Log in with a valid Zoho account.
 - Open the application/workspace where the data is already available.
2. Enabling Zia in Zoho Creator
 - Navigate to the application's **Settings**.
 - Locate and enable the **Zia** feature (AI-powered assistant) for the application.
 - Zia analyzes existing form data and field patterns to enable smart suggestions.
3. Using Zia for Data Entry Assistance
 - Open a form where Zia is enabled.
 - Use **Zia Voice/Text-based data entry** to add records using natural language commands (e.g., "Add a new customer named John with phone number...").
 - Use **Field Prediction** — Zia auto-suggests values for fields based on historical data patterns.
 - Use **Anomaly Detection** — Zia flags unusual or inconsistent data entries automatically (e.g., an abnormally high order amount).
4. Setting Up Zoho Analytics Workspace
 - Go to analytics.zoho.com and log in.
 - Create a **New Workspace** for the project.
 - Import data by:
 - Connecting directly to the Zoho Creator application, or
 - Uploading a file (CSV/Excel), or

Connecting to a database/URL.

5. Creating Reports in Zoho Analytics

- Select the imported table(s).
- Click **Create Report** and choose the report type (Chart, Pivot Table, Summary View, Tabular View).
- Drag and drop the required dimensions and measures into the report designer.
- Apply filters and formatting as needed.

6. Using Zia (Ask Zia) in Zoho Analytics

- Open the **Ask Zia** search bar within the workspace.
- Type a natural language query about the data (e.g., "Show total sales by region for 2025").
- Zia automatically interprets the query and generates the appropriate chart/report as output.
- Refine the query if needed to get a more specific visualization.

7. Predictive Analysis Using Zia

- Select a report/table suitable for forecasting (e.g., sales trend data).
- Use the **Forecasting** option under Zia-powered analytics.
- Zia applies AI/ML algorithms to predict future trends (e.g., next month's sales) and displays them as a forecast chart.

8. Building Dashboards

- Combine multiple Zia-generated and manually created reports into a single **Dashboard**.
- Arrange components, apply themes, and add filters for interactivity.

9. Publish and Share

- Publish the dashboard/workspace.
- Share access with relevant users/stakeholders with appropriate permission levels (View/Edit).

Inventory Tracking Report

The screenshot shows the 'Inventory Tracking Report' in the Zoho Creator application. The report is a table with columns: Book, Current Location, Last Updated, Status, Condition, and Last Maintenance. The table contains 5 rows of data. The first row is for '1984 To Kill a Mockingbird' in the 'Reading Area' with status 'In Stock'. The second row is for '1984 To Kill a Mockingbird' in the 'Storage Room' with status 'Missing'. The third row is for '1984 To Kill a Mockingbird' in the 'East Wing' with status 'Reserved'. The fourth row is for '1984 To Kill a Mockingbird' in the 'West Wing' with status 'In Stock'. The fifth row is for '1984 To Kill a Mockingbird' in the 'West Wing' with status 'In Stock'. The table is filtered by 'Book' and 'Status'. The left sidebar shows the application menu with options like Dashboard, Borrow Records, Returns, Books, Members, Inventory Tracking, and Board. The top bar shows the application name 'Library Management System' and a trial expiration date of 8 days.

Book	Current Location	Last Updated	Status	Condition	Last Maintenance
1984 To Kill a Mockingbird The Great Gatsby Harry Potter and the Sorcerer's Stone	Reading Area	24-Jul-2026 16:00:00	In Stock	Good	24-Jun-2026
1984 To Kill a Mockingbird Pride and Prejudice The Great Gatsby Harry Potter and the Sorcerer's Stone	Storage Room	24-Jul-2026 14:20:00	Missing	Used	10-Jul-2026
1984 To Kill a Mockingbird Pride and Prejudice The Great Gatsby Harry Potter and the Sorcerer's Stone	East Wing	24-Jul-2026 09:45:00	Reserved	New	01-Jul-2026
1984 To Kill a Mockingbird Pride and Prejudice	West Wing	24-Jul-2026 11:15:00	In Stock	Good	20-Jun-2026

Inventory Tracking Form

The screenshot shows the 'Inventory Tracking Form' in the Zoho Creator application. The form is a simple form with fields for Book, Current Location, Last Updated, Status, Condition, and Last Maintenance. The 'Book' field is a text input. The 'Current Location' field is a text input. The 'Last Updated' field is a date and time input. The 'Status' field is a dropdown menu. The 'Condition' field is a dropdown menu. The 'Last Maintenance' field is a date input. The form has a 'Submit' button and a 'Reset' button. The left sidebar shows the application menu with options like Dashboard, Borrow Records, Returns, Books, Members, Inventory Tracking, and Board. The top bar shows the application name 'Library Management System' and a trial expiration date of 8 days.

Result:

Thus, Zia and Zoho Analytics were successfully used to perform AI-driven data entry assistance, anomaly detection, natural language querying, and predictive analysis. Intelligent reports and dashboards were generated automatically using Zia's capabilities, enabling faster and more accurate data-driven decision-making.
